KRW Civil Dept secures over £500,000 Damages for RTA claimant

We are pleased to announce the settlement last week of a major High Court action for a badly injured cyclist. He was struck by a car over four years ago and sustained potentially life threatening injuries. Thankfully he recovered better than expected but he still bears the scars and memories of a horrible collision.

We had to instruct over eight different medical specialists to engage on the physical and psychological injury complexities of this case. Our Civil Litigation Dept led by Senior Associate Mr Martin Durkan together with instructed counsel Mr Brian Fee KC and Mr Rory McNamee BL secured one of our biggest ever settlement figures amounting to a figure of more than half a million pounds.

Speaking on the announcement of the settlement, Mr Durkan said,

“ These were life changing injuries sustained by our client. Whilst no amount of money can ever properly compensate him for what he went through and what he still has to endure to this day, we are nevertheless very pleased with the figure achieved for him. Hopefully it will go some way to addressing the physical and mental ordeal suffered by him.

What’s probably most satisfying was the relative speed with which we were able to advance the case. We feel it’s only right to put on record our appreciation for the collaborative approach taken by the defendant insurance company. They didn’t contest liability and approached the case on a quantum only basis which really helped reduce a lot of the anxiety for our client and his family. We want to thank him for entrusting us with this important instruction. We wish him well for the future.”
